

NB Distressed Debt Investment Fund Limited – Extended Life Shares (“NBDX”)

NBDX FUND OBJECTIVE

NB Distressed Debt Investment Fund Limited's ("NBDDIF") primary objective is to provide investors with attractive risk-adjusted returns through long-biased, opportunistic stressed, distressed and special situation credit-related investments while seeking to limit downside risk.

NBDDIF's holdings are diversified across distressed, stressed and special situations investments, with a focus on senior debt backed by hard assets. The portfolio is managed by the Distressed Debt team at Neuberger Berman, which sits within what we believe is one of the largest and most experienced non-investment grade credit teams in the industry.

On 31 March 2015, the investment period of the Extended Life Share Class ("NBDX") expired and the assets of NBDDIF attributable to the Extended Life Shares were placed into the harvest period. There were no share buybacks during the quarter. Inception to date, distributions stand at \$333.0 million or 93% of original capital (income by way of dividend, capital by way of redemption and share buybacks).

The Extended Life Share Class is one of three classes of shares in NBDDIF. The others are the Ordinary Share Class and the New Global Share Class. The Ordinary Share Class was subject to an investment period which ended on 10 June 2013 and the New Global Share Class was subject to an investment period which ended on 31 March 2017. Separate factsheets are produced for those share classes.

Figures presented are based on quarter-end published financial information and financial information provided by U.S. Bank Global Fund Services (Guernsey) Limited / U.S. Bank Global Fund Services (Ireland) Limited, as administrator to NBDDIF (the "Administrator"). MANAGER COMMENTARY

In the first quarter of 2025, investors were focused on stabilising inflation, the outlook for US Fed policy and interest rates, and changing economic policy as a result of the elections in the United States. Looking ahead, investors will continue to monitor multiple trends including trade policy, global growth, the ultimate destination of rates, and geopolitical events. All could lead to elevated volatility over the next 12 months and beyond. Given these circumstances, the timing and quantum of any financial impact on the portfolio remain difficult to predict. Despite the uncertainty, the investment manager remains committed to realising the investments in an orderly manner and winding down the share class as soon as practicable.

For regulatory reasons, the final 10% of the total return (NAV plus cumulative distributions) in respect of any class of participating shares in NBDDIF will be returned to shareholders with a final compulsory redemption of all the outstanding shares of that class. We do not anticipate making any further distributions prior to the liquidation of the Company.

While uncertainty in markets remains, we have reviewed the remaining investments to provide guidance on their realisable values. The investment manager uses economic, industry and issuer-specific data to estimate the gross realisable value in downside, base case and upside scenarios for each investment in the portfolio. It currently estimates that the range of the aggregated realisable value for the investments in the portfolio is between 82% and 126% of the quarter-end market values of these investments, with a base case of 114%. Shareholders should, however, note that: (i) the realisable values of the investments are calculated on a gross basis and, in particular, do not reflect any applicable third-party expenses; and (ii) this range of aggregate realisable values is an estimate only, with no guarantee that the value actually realised will be within this range. Further details on the risks relating to "forward looking information" are set out at the end of this announcement.

Portfolio Update

NBDX ended the quarter with a NAV per share of \$0.95 compared with \$0.99 at the end of last quarter. NAV decreased 4.1% during the quarter. At quarter-end, 56% of NBDX's NAV was invested in distressed assets 44% held in cash including U.S. Treasury securities.

The remaining portfolio consists of 5 issuers across 4 sectors, including surface transport, containers & packaging, and commercial mortgages. The ratio of distributions, both income and capital, to original capital, is 93%. Including the current NAV, the figure rises to 103%.

Exits

The main assets of an oil and gas investment were sold during 4Q24, with the remaining claim sold on the secondary market in 1Q25 for a full exit.

A surface transport asset was sold in 1Q25 for a full exit after the funds received an executable bid for the debt amidst uncertainty around timing of the ultimate arbitration decision.

Inception to date there have been 75 exits with a total return of \$23.7 million, weighted average IRR of 2% and weighted average ROR of 6%.

Distributions

Inception to date, a total of \$333.0 million or 93% of original capital has been distributed, via dividends, redemptions and share buybacks.

The investment manager has undertaken a review of all the investments in the light of a changed market. The table below provides an overview of the status of each of the remaining holdings in the portfolio.

We will continue to update shareholders as we gain further clarity on investment realisations.

HOLDING	INDUSTRY	% NAV ⁶	INVESTMENT STATUS
1	Surface Transport	25%	Litigation ongoing, no near-term resolution expected, exploring a secondary market sale
2	Containers & Packaging	14%	Profitability impacted by lower volumes; capital markets exit postponed until results regain momentum
3	Commercial Mortgage	12%	Continue to lease space as we prepare for exit; we target a sale in 2025
4	Oil & Gas	3%	Main assets were sold and proceeds were distributed in 4Q24; remaining claim sold in the secondary market in 1Q25 and settled following quarter end.
5	Containers & Packaging	2%	Profitability impacted by lower volumes; capital markets exit postponed until results regain momentum
		62%	

As explained above, due to regulatory reasons, the final 10% of total return in respect of any class of participating shares in NBDDIF will be returned to shareholders with the final compulsory redemption of all the outstanding shares of that class.

In the harvest period, we continue to focus on restructuring and monetising our investments, balancing timely realisations with maximising proceeds to our shareholders. Changes to timing are expected based on current market conditions and investment developments and will continue to be updated in these factsheets.

Share Buybacks

The share buyback programme was intended to narrow the discount during the investment period. At this point of the harvest period, our priority, taking into account shareholder feedback, is the return of capital. The Board does not anticipate being able to make any further buybacks.

NBDDIF did not repurchase any shares in NBDX during the quarter. Inception to date, a total of 14,643,634 NBDX shares, or 4% of the original NBDX shares at a cost of \$12.1 million, have been repurchased and cancelled.
