

NB Distressed Debt Investment Fund Limited – Ordinary Shares (“NBDD”)

30 June 2019

NBDD FUND OBJECTIVE

NB Distressed Debt Investment Fund Limited’s (“NBDDIF”) primary objective is to provide investors with attractive risk-adjusted returns through long-biased, opportunistic stressed, distressed and special situation credit-related investments while seeking to limit downside risk.

NBDDIF’s holdings are diversified across distressed, stressed and special situations investments, with a focus on senior debt backed by hard assets. The portfolio is managed by the Distressed Debt team at Neuberger Berman, which sits within what we believe is one of the largest and most experienced non-investment grade credit teams in the industry.

On 10 June 2013, the investment period of the NBDD Share Class (“NBDD”) expired and the assets of NBDDIF attributable to the Ordinary Shares were placed into the harvest period. \$132.8 million (equivalent to 107% of original capital) has been distributed (income by way of dividend and capital by way of redemption) to shareholders since the realisation phase for this share class began.

The Ordinary Share Class is one of three classes of shares in NBDDIF. The others are the Extended Life Share Class and the New Global Share Class, which both offered exposure to new opportunities in this asset class beyond 10 June 2013. The Extended Life Share Class was subject to an investment period which ended on 31 March 2015 and the New Global Share Class was subject to an investment period which ended on 31 March 2017. Separate factsheets are produced for those share classes.

MANAGER COMMENTARY

NBDD is in the harvest period and the investment manager is working to restructure, reorganise, and realise exits for each investment to maximise the value of the portfolio for the shareholders. During the harvest period, the investment manager seeks a catalyst for each of the remaining investments that will allow for a realisation and return of capital and profits, if applicable.

The investment manager uses economic, industry and issuer specific data to estimate the gross realisable value in downside, base case and upside scenarios for each investment in the portfolio. It currently estimates the range of the aggregated realisable value for the investments in the portfolio is between 87% and 149% of the 30 June 2019 market values of these investments, with a base case of 121%. Shareholders should, however, note that: (i) the realisable values of the investments are calculated on a gross basis and, in particular, do not reflect the investment manager's management fee and investment-related expenses; and (ii) this range of aggregate realisable values is an estimate only, and there is no guarantee that the value actually realised will be within this range. Further details on the risks relating to "forward looking information" are set out at the end of this factsheet.

There were no exits during the quarter. The ratio of total value (capital distributions, dividends and current NAV) to original capital is 118%.

Portfolio Update

NBDD ended the quarter with NAV per share of \$0.9364 as compared to \$0.9888 at the end of March 2019. The NAV decreased by 5.30% in the quarter, principally driven by unrealised losses in Vistra public equity and an auto component credit/equity investment. During the harvest period, reorganised equities, including public equities, represent a larger percentage of the fund's investments. More detail can be found below. At quarter-end, 92% of NBDD's NAV was invested in distressed assets (including cash in subsidiary accounts, receivables and net payables) with 8% held in cash net of payables.

The portfolio consists of 12 issuers across 8 sectors. The largest sector concentrations were in surface transportation, utilities, building & development and auto components.

Data as at 30 June 2019. Past performance is not indicative of future returns. All comments unless otherwise stated relate to NBDD.

Portfolio Update (continued)

Public Equity

In the harvest period the public equity portion of the portfolio is increased as the result of debt-for-equity conversions. The NBDD portfolio currently includes the following public equity holdings:

ISSUER	MARKET VALUE AT 30 JUNE 2019 (\$ millions)	% NAV
Five Point Holdings LLC	2.3	16.2%
Vistra Energy Corp (fka TECH)	2.3	15.7%
Eagle Bulk Shipping Inc	0.2	1.5%
Star Bulk	0.1	0.5%
Total	4.9	33.9%

Notable events² below describe activity in the investments during the quarter and post quarter-end.

- Financial Intermediary – Industry turmoil and illiquidity in the private notes negatively impacted pricing despite positive regulatory developments - including the approval of a distribution to noteholders made in 3Q19.
- Auto Components – During the quarter the company completed a recapitalisation. It issued \$150m of super priority notes, completed coercive exchange offers for its existing First Lien and Second Lien Notes and amended its credit facilities. The company increased its current liquidity by \$125 million, converted nearly \$175 million of debt into equity, reduced its ongoing cash interest burden and extended its maturity profile.

Significant Value Change (approximately 0.5% of NBDD NAV or +/- \$100,000)³

INDUSTRY	INSTRUMENT	2Q19 TOTAL RETURN (\$ in millions)	MARKET VALUE (\$ in millions)	QUARTERLY PRICE CHANGE	COMMENT

Auto Components	Various	\$(0.6)	\$1.6	-15%	New financing transaction and coercive distressed exchange offer decreased valuation of existing securities

Exits

There were no exits during the quarter. Inception to date, NBDD has experienced 43 exits with a total return of \$43.1 million, IRR of 15% and ROR of 28%.

Partial Realisations

There was no activity during the quarter. The table below has been updated with current values.

PARTIAL REALISATION	SECTOR	QUARTER REPORTED	CASH INVESTED	CASH RECEIVED TO DATE	CURRENT VALUE OF INVESTMENT	TOTAL RETURN	CURRENT IRR	CURRENT ROR	MONTHS HELD
3	Containers & Packaging	2Q17	\$2.0 million	\$2.8 million	\$0.2 million	\$1.0 million	26%	50%	78
4	Containers & Packaging	2Q17	\$2.6 million	\$6.5 million	\$1.4 million	\$5.3 million	53%	206%	81

Distributions

For regulatory reasons, the final 10% of the total return (NAV plus cumulative distributions) in respect of any class of participating shares in NBDDIF will be returned to shareholders with a final compulsory redemption of all of the outstanding shares of that class. The next distribution for NBDD will be the final distribution to investors and will wind down the share class. Our intention had been to make the final distribution in the 4th quarter of 2019, assuming the resolution of the portfolio investments. There is currently some timing uncertainty with three key investments and therefore the final distribution may occur in the first half of 2020. We will continue to update investors as we gain clarity on the realisations.

Please note that an investment may experience a change in value (positive or negative) during the quarter whether or not it was subject to a notable corporate event. Not all events involving existing investments are disclosed. In addition, certain corporate events may not have been disclosed due to confidentiality obligations.
