

NB Distressed Debt Investment Fund Limited – Ordinary Shares (“NBDD”)

NBDD FUND OBJECTIVE

NB Distressed Debt Investment Fund Limited’s (“NBDDIF”) primary objective is to provide investors with attractive risk-adjusted returns through long-biased, opportunistic stressed, distressed and special situation credit-related investments while seeking to limit downside risk.

NBDDIF’s holdings are diversified across distressed, stressed and special situations investments, with a focus on senior debt backed by hard assets. The portfolio is managed by the Distressed Debt team at Neuberger Berman, which sits within what we believe is one of the largest and most experienced non-investment grade credit teams in the industry.

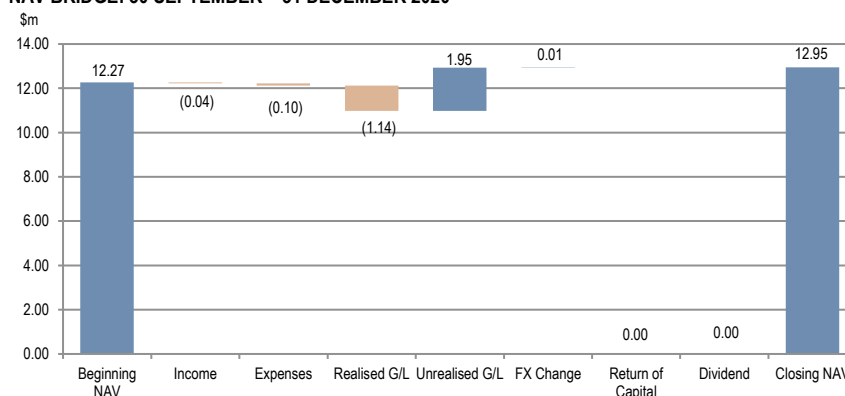

On 10 June 2013, the investment period of the NBDD Share Class (“NBDD”) expired and the assets of NBDDIF attributable to the Ordinary Shares were placed into the harvest period. \$132.8 million (equivalent to 107% of original capital) has been distributed (income by way of dividend and capital by way of redemption) to shareholders since the realisation phase for this share class began.

The Ordinary Share Class is one of three classes of shares in NBDDIF. The others are the Extended Life Share Class and the New Global Share Class, which both offered exposure to new opportunities in this asset class beyond 10 June 2013. The Extended Life Share Class was subject to an investment period which ended on 31 March 2015 and the New Global Share Class was subject to an investment period which ended on 31 March 2017. Separate factsheets are produced for those share classes.

Beginning NAV and Closing NAV are based on published NAVs for NBDD and not on a per share basis.

Realised and Unrealised gain/loss include intraquarter adjustments that have no effect on YTD NAV.

FX Changes due to share class's exposure to foreign currencies. As detailed in its prospectus, the share class may, but is not required to, engage in currency hedging in connection with investments in assets not denominated in US dollars (the currency in which shares are denominated).

Return of Capital includes distributions and buy backs.

Figures presented are based on quarter-end published financial information and financial information provided by U.S. Bank Global Fund Services (Guernsey) Limited / U.S. Bank Global Fund Services (Ireland) Limited, as administrator to NBDDIF (the “Administrator”). This NAV bridge has not been audited and figures are subject to change.

MANAGER COMMENTARY

The regulatory approval and commencement of vaccine rollout has lifted public equity markets and provided investors and consumers with scope for renewed optimism. However, the pace of rollout remains sporadic and the economic impact on companies and different sectors remains the primary area of uncertainty for investors. Ongoing outbreaks of new virus strains and the debate around the right speed at which to lift restrictions continues to prevail and curtail robust economic activity. Investors continue to monitor both the pace and coverage of large-scale vaccine development and distribution, as well as hospitalisation rates and therapeutic treatment improvements. Given these circumstances, the timing and quantum of any financial impact on the portfolio remains very difficult to predict. Despite the uncertainty, the investment manager remains committed to realising the investments in an orderly manner and winding down the share class as soon as practicable. We continue to actively work on the exit of one investment that will determine the final distribution date. The investment manager has announced that, in light of the delay in winding down the share class, it is waiving the advisory fee on cash and cash equivalent balances held by the share class while it is unable to make any distributions due to the final 10% holdback period. This was effective from 1 October 2020.

For regulatory reasons, the final 10% of the total return (NAV plus cumulative distributions) in respect of any class of participating shares in NBDDIF will be returned to shareholders with a final compulsory redemption of all of the outstanding shares of that class. As such, there will be no further distribution for NBDD until the final distribution to investors and the wind-down of the share class. The investment manager is evaluating options to wind down NBDD and will keep investors informed as there is more clarity.

While uncertainty in markets remains, we have reviewed the remaining investments to provide guidance on their realisable values. The investment manager uses economic, industry and issuer specific data to estimate the gross realisable value in downside, base case and upside scenarios for each investment in the portfolio. It currently estimates that the range of the aggregated realisable value for the investments in the portfolio is between 80% and 174% of the 31 December 2020 market values of these investments, with a base case of 129%. The range tightened and the base case decreased mainly due to an increase in value of the private equity of the packaging investment which was already reflected in the NAV. Shareholders should, however, note that: (i) the realisable values of the investments are calculated on a gross basis and, in particular, do not reflect any applicable investment management fee and investment-related expenses; and (ii) this range of aggregate realisable values is an estimate only, with no guarantee that the value actually realised will be within this range. Further details on the risks relating to “forward looking information” are set out at the end of this announcement.

Portfolio Update

NBDD ended the quarter with a NAV per share of \$0.8415 compared with \$0.7975 at the end of September 2020. The NAV increased 5.5% in the quarter, principally driven by operating improvement at the packaging company investments resulting in a higher equity price. At quarter-end, 58% of NBDD’s NAV was invested in distressed assets (including net cash held in subsidiaries), with 42% held in cash including U.S Treasury securities. Cash continues to build as assets are realised.

The portfolio consists of 5 issuers across 4 sectors. The largest sector concentrations were in containers & packaging, surface transportation, and financial intermediaries. There were no exits during the quarter. The ratio of total value (capital distributions, dividends and current NAV) to original capital is 117%.

Distributions

As explained above, due to regulatory reasons, the final 10% of the total return (NAV plus cumulative distributions) in respect of any class of participating shares in NBDDIF will be returned to shareholders with a final compulsory redemption of all of the outstanding shares of that class. The next distribution for NBDD will be the final distribution to shareholders and will wind down the share class. Our current expectation is to wind down the fund in 2021, unchanged from last quarter. We will continue to update shareholders as we gain clarity on the realisations.

2. Notable corporate events may or may not result in an increase or decrease in the value of an NBDD investment or a change in NBDD's NAV per share. Please note that an investment may experience a change in value (positive or negative) during the quarter whether or not it was subject to a notable corporate event. Not all events involving existing investments are disclosed. In addition, certain corporate events may not have been disclosed due to confidentiality obligations.

Not all relevant events or conditions may have been considered in developing such assumptions. The success or achievement of various results and objectives is dependent on a multitude of factors, many of which are beyond the control of the Company and Neuberger Berman. Actual volatility and returns will depend on a variety of factors including overall market conditions and the ability of the Company and Neuberger Berman to implement its process, investment strategy and risk management policies. No representations are made as to the accuracy of such estimates or projections or that such projections will be realised. Actual events or conditions are unlikely to be consistent with, and may differ materially from, those assumed.

An investment in the Company involves risks, with the potential for above average risk, and is only suitable for people who are in a position to take such risks. No recommendation or advice is being given as to whether any investment or strategy is suitable for a particular investor. Each recipient of this document should make such investigations as it deems necessary to arrive at an independent evaluation of any investment, and should consult its own legal counsel and financial, actuarial, accounting, regulatory and tax advisers to evaluate any such investment. It should not be assumed that any investments in securities, companies, sectors or markets identified and described were or will be profitable. Investment in the Company should not constitute a substantial proportion of an investor’s portfolio and may not be appropriate for all investors. Diversification and asset class allocation do not guarantee profit or protect against loss.

Past performance is not a reliable indicator of current or future results. The value of investments may go down as well as up and investors may not get back any of the amount invested. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units.

The value of investments designated in another currency may rise and fall due to exchange rate fluctuations in respect of the relevant currencies. Adverse movements in currency exchange rates can result in a decrease in return and a loss of capital.

Tax treatment depends on the individual circumstances of each investor and may be subject to change, investors are therefore recommended to seek independent tax advice.
